 - Incremental impact on our revenue due to the remedy implementation and the resulting agreement to distribute cleaners
- 2** Small customer overlap in Europe and Southern Hemisphere

Summary: revenue synergies and dis-synergies

Bolt-on acquisitions can provide additional acceleration to established platform

Capex (-)	31.4	31.9	1.6%
Free Cash Flow	172.9	177.8	2.8%

- Free Cash Flow grew 2.8% year-on-year despite higher Inventory levels driven by higher EBITDA generation.
- Net Financial Debt at constant currency rates shows a decrease of 2.4%.
- The IFRS 16 implementation adds €107.3m of lease liabilities to Net Debt.

CONCLUSIONS

- 1. Solid Q3 performance in the Northern Hemisphere. US confirms recovery with solid sell-through in the channel and the elimination of the backlog generated by the gas heater plant.**
- 2. Very good progress with synergies, achieving €26m full year run rate savings; we are very well aligned with our updated guidance of €40m run rate cost synergies for the 2022 Plan.**
- 3. The US Early Buy orders received show solid increase and position us well to deliver a strong Q4.**
- 4. With a seasonal business, divestments and the integration process, some quarters may show unusual comparisons. Positioned to deliver our 2019 full year guidance:**
 - Sales between €1,350 - €1,400 m**
 - EBITDA between €240 - €260 m (€262 - €282 m post IFRS 16)**
 - Net Debt / EBITDA ratio below 2.6x (at 2.6x post IFRS 16)**
